

## HSF02 Adjustment mount for translation in x/y-direction and z-axis rotation

### PRODUCT FEATURES

- ▲ Mount for 1inch optics
- ▲ Translation in x- and y-direction
- ▲ Rotation around z-axis

### APPLICATIONS

Alignment of

- ▲ beam shapers
- ▲ lenses
- ▲ other optical elements

For alignment of Top Hat beam shapers a x-y-positioner is recommended. The positioner HSF02 allows translation of the mounted beam shaper in x/y-direction. HSF02 also enables the rotation of the beam shaper around the z-axis. Hereby it is possible to rotate/align the TopHat. HSF02 can also be used for other (dia. 1inch) optics.

### SPECIFICATIONS

Travel range	max. 5,5mm
Clear/free aperture	23mm
Substrate sizes	Ø25.4 mm thickness max. 9mm
Positioning	Fine adjustment screws
Mounting to post	M6 threaded hole

### DIMENSIONS
