

HSF03 Adjustment mount for rotation around z-axis

PRODUCT FEATURES

- ▲ Mount for 1inch optics
- ▲ Rotation around z-axis
- ▲ Lockable

APPLICATIONS

Alignment of

- ▲ beam splitters
- ▲ polarizer
- ▲ other optical elements

For alignment of Beam Splitters and Beam Samplers, a rotation mount is recommended.

The holder HSF03 allows rotation of the mounted beam splitter around z-axis. Hereby, it is possible to rotate/align the spot array in the focal/working plane. HSF03 can also be used for other optics (dia. 1inch).

SPECIFICATIONS

Rotation	360° continuous
Clear/free aperture	23mm
Substrate sizes	Ø25.4 mm, thickness max. 13mm
Material	black anodized aluminum
Mounting to post	M6 + M4 threaded holes

DIMENSIONS
